

# Population Health in USA, England und Spanien – (k)ein Modell für Deutschland?

Dr. Frederic Gerdsen

*Population Health Executive, Consulting Central Europe*

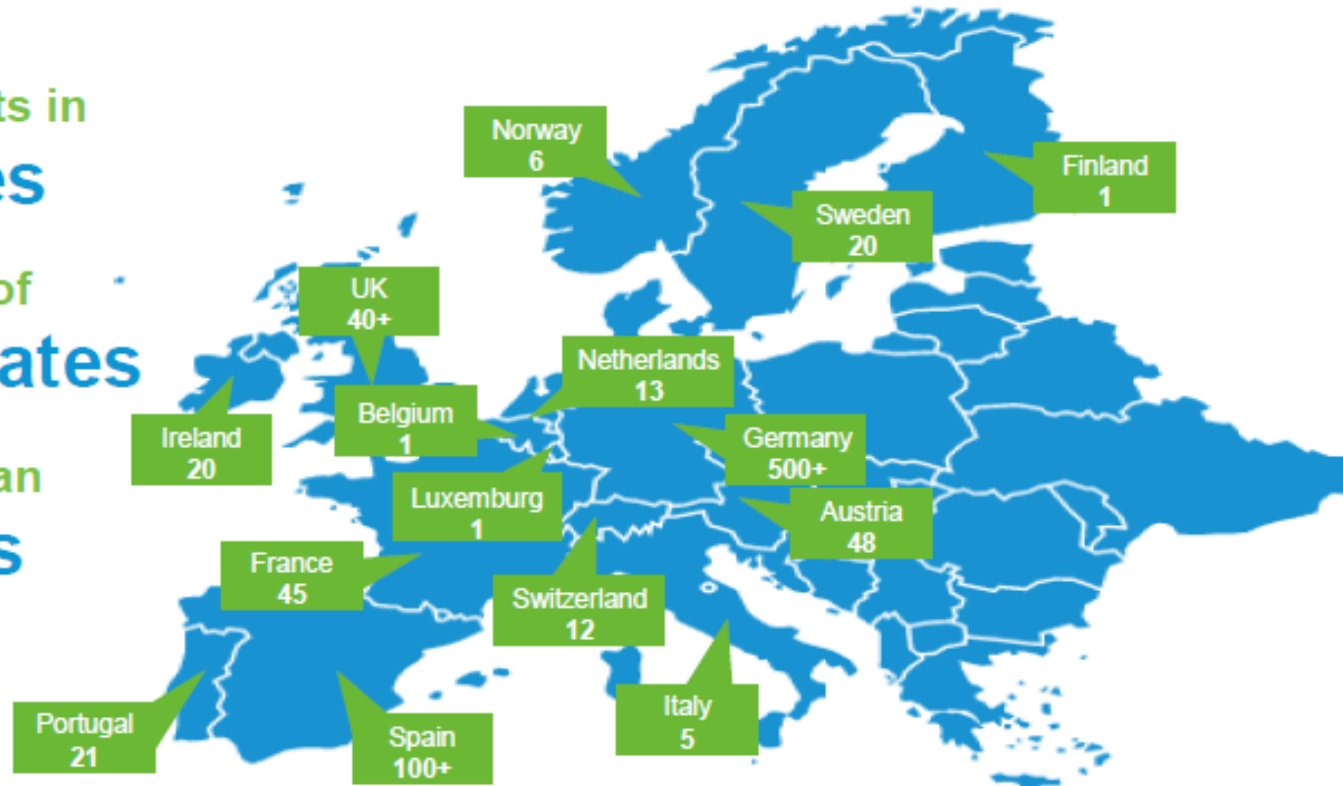

December 13, 2016

# Cerner - The largest HC-IT footprint in Europe

Working with clients in  
**15 countries**

Local presence of  
**+1,500 associates**

Used by more than  
**800 clients**

*Numbers in boxes denote number of hospitals served by Cerner solutions*

Globally:

Working with clients in  
**30+ countries**

Solutions in more than  
**18,000 facilities**

Global family of more than  
**21,000 associates**

Annual R&D investment of over  
**\$650 million**

Annual Revenue of more than  
**\$4.8 billion\***

*\*Based on 2015 estimates*

## Ziel:

Entwicklung und Einführung neuer, evidenzbasierter, integrierter Versorgungsmodelle basierend auf einer Populations Health Management IT Plattform.

Initiative und finanzielle Unterstützung durch den NHS.

- Aggregierte Datensicht (single-source-of-truth)
- Regionale Vernetzung von Erst- und Zweitversorgern (56 General Practitioners und one Acute University Hospital)

- Integriertes Versorgungsmodell für Patienten (insbesondere chronische Krankheiten wie Diabetes, Asthma und COPD) erarbeitet
- Kumulierte Kosteneinsparung über die nächsten 5 Jahre von
  - ~2 Millionen Euro (Diabetes)
  - ~1,83 Millionen Euro (COPD)

## Care Management Pathways

- Asthma Adult & Paediatric
- COPD
- Diabetes Adult & Paediatric
- Epilepsy
- Heart Failure
- Hypertension
- Sickle Cell
- Depression
- ADHD
- Chronic Otis Media
- Chronic Pain Pediatric
- Autoimmune Disease
- Sleep Disorders
- Hemophilia Pediatric
- Cardiovascular Special Care
- Stroke
- Chronic Pain Adult
- Communicable/Infectious Disease
- Anxiety
- HIV/AIDS
- Hemophilia
- Atrial Fibrillation
- Inflammatory Bowel Disease
- Dyslipidemia
- Obesity
- Malnutrition Adult
- Wellness Adult

**Wirral 82.3**

**Wirral 77.8**  
**England 79.4**

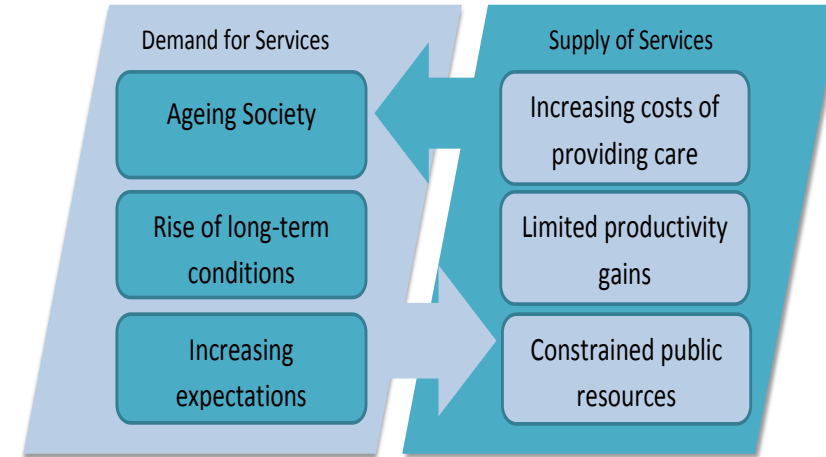

Wirral

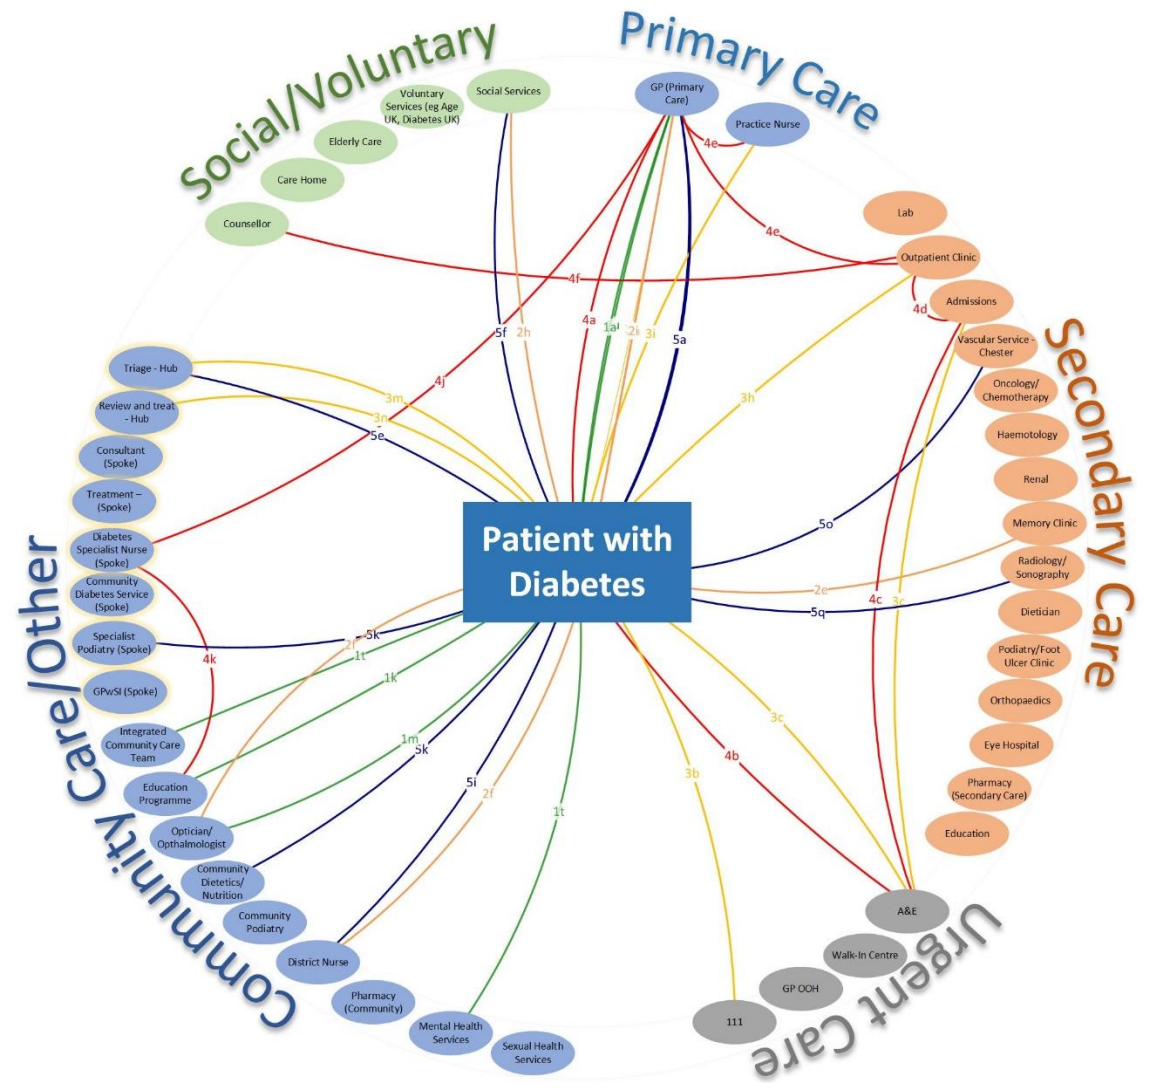

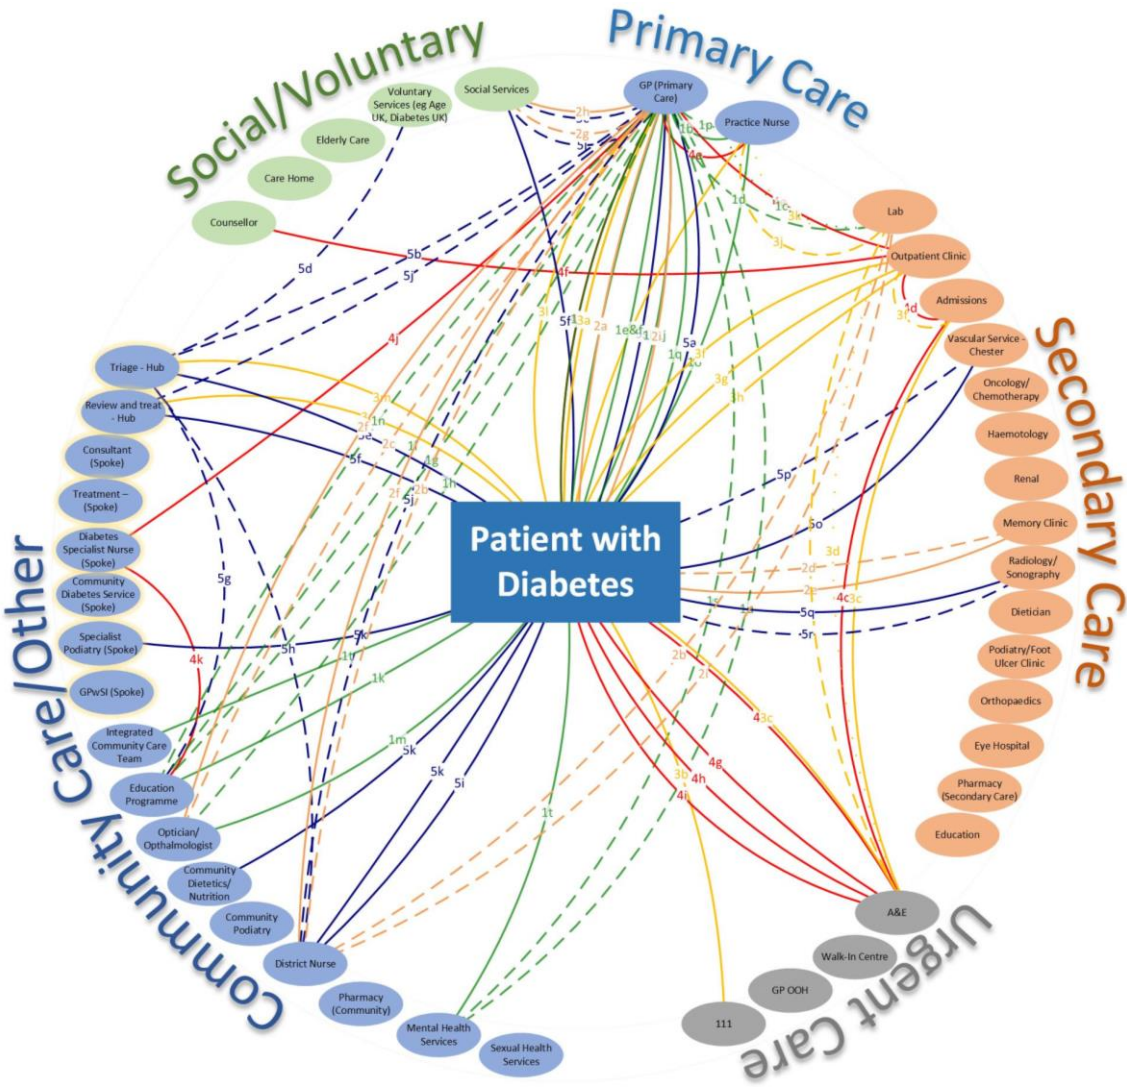

England

# Änderung notwendig

- Gap von ~200m € bezüglich prognostizierter angeforderter Leistung und der möglichen finanziellen Vergütung
- Bevölkerungswachstum:
  - 319,863 in 2011 zu 324,226 in 2021
- Anzahl der über 85 jährigen wird sich in den nächsten 20 Jahren verdoppeln (Abstieg multi-morbider Patienten)
- Große regionale Abhängigkeit des Gesundheitstatus, selbst innerhalb der Region Wirral

# Patient Engagement / Why we have to re-think?

## Social Media Campaign

- 330k population
- Covering approx. 290k people
- 96k views face book alone
- 700 people opt out total

“It is a future that **empowers patients** to take much more control over their own care and treatment. It is a future that **dissolves the classic divide**, set almost in stone since 1948, between family doctors and hospitals, between physical and mental health, between health and social care, between prevention and treatment. One that no longer sees expertise locked into often outdated buildings, with services fragmented, **patients having to visit multiple professionals for multiple appointments, endlessly repeating their details** because they **use separate paper records**. One organized to support people with multiple health conditions, not just single diseases. A future that sees far more care delivered locally but with some services in specialist centers where that clearly produces better results”.

*(Source: Chapter 1, NHS Five Year Forward View)*

# Bestehende Hürden in Deutschland

- Föderale Datenschutzstruktur in Deutschland (20 verschiedene Gesetze)
  - Regionale Verbände werden damit faktisch auf Bundesländer und/oder Träger begrenzt
- Fehlender Einsatz einer übergreifenden Semantik/Ontologie
  - Kein verbindlich anzuwendendes Terminologie System vorhanden (fehlende Snomed CT Lizenz in Deutschland)
  - Keine ausreichende Nutzung international anerkannter Terminologien ala LOINC
- Finanzierungssystem – weiterhin zu starre Trennung in Sektoren (ambulant, stationär, Reha, Altenpflege) – keine übergreifende Behandlung mit dem Patienten im Mittelpunkt, da es keine (oder sogar gegenläufige) finanzielle Anreize gibt
- Nicht ausreichende Digitalisierung der einzelnen Provider (HIMSS Platzierung Deutschland) – keine ausreichende IT Budgets in den einzelnen Sektoren

# Empfehlungen

- **Wandel vom reaktiven zum proaktiven Gesundheitswesen auf allen Ebenen unterstützen**
  - Den Patienten als Partner im Gesundheitswesen begreifen (jeder hat einen Arzt in sich)
  - Stärkung der Rolle des Bürgers in der Vorsorge durch Erstattungsmodelle (Krankenkassen)
  - Wandel zu populationsbasierten Vergütungsmodellen (volume-based to quality-based Incentives)
  - Stärkung von Gesetzen, die die traditionelle Sektorentrennung überwinden (§137 ff)
  - Stärkung der betrieblichen Gesundheitsvorsorge durch Steuersparmodelle (BMF)
  - Ergänzung des Morbi RSA durch einen Gesunderhaltung-RSA (d.h. Kassen, deren Patienten sich besonders aktiv an der Vorsorge beteiligen erhalten mehr Geld)
- **Digitalisierung im deutschen Gesundheitswesen nachhaltig unterstützen und incentivieren (Anreizmodelle)**
  - HIMSS Level Modell als Differentiator
  - Nutzung allgemein anerkannter internationaler Standards (LOINC, UMLS)
  - Verbindliche Einführung des SNOMED CT (BMG, Ausführender DIMDI)
  - SMART/FHIRE Unterstützung der industriellen Partner
  - Eine allgemeine Datenstruktur für eine deutschlandweite Akte (bvitg, und andere Verbände)
- **Ein nationales Datenschutzgesetz für das Gesundheitswesen (Politik)**
- **Stärkung der übergreifenden und kohortenbasierten Forschung (BMBF, aber auch EU)**
